

CNC WaterJet Cutting

Starflex Corporation offers a complete range of **CNC Cutting, Machining & '3D' Bending.**

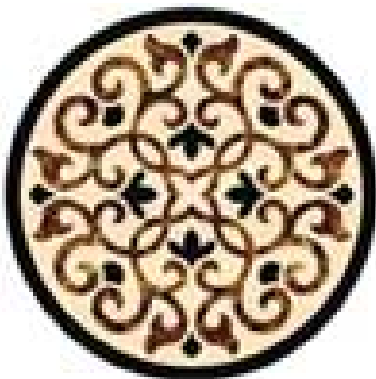

Our latest addition being a **'Calypso' Dual Head WaterJet Cutter.**

From one off prototypes, to large volume production runs, Starflex has the expertise and flexible resource, to produce the highest quality components at an exceptional value.

Steel, Aluminum, Granite, Marble, Wood, Insulation board & glass, are just a small selection of materials that can be cut.

Cutting up to **6" thick steel**, pre-machine blanks can save hours of expensive shop time, machine 'ware and tare', and cutting consumables.

Many critical steel and aluminum parts benefit from low temperature cutting, resulting in **zero heat distortion.**

State of the art nesting software, ensures minimum material waste, and very competitive pricing.

"Please give us the opportunity to demonstrate our speed, quality, and value"

CNC Machining & Fabrication

If you are looking for precision machining or fabrication, at a competitive price, and timely delivery, we can help.

From one off prototypes, to large volume production runs, Starflex has the expertise, and flexible resource, to produce the highest quality components.

We continue to build on our reputation for quality, value, and reliability, and we guarantee our customers satisfaction.
